AST-XPAND™
EXPANDING FOAM SEALANT
SAFETY DATA SHEET

Section 1- Product and Company Identification

Manufacture/Supplier: Anti-Seize Technology
2345 N. 17th Ave.
Franklin Park, IL 60131

Phone: 847-455-2300
Fax: 847-455-2371
Web: antiseize.com
Emergency Phone, 24 hr: Infotrac @ 1-800-535-5053 (US & Canada)
1-352-323-3500 (International)
Web: infotrac.net

Product Use: Foam insulator and sealant
Restriction of Use: None presently known

Date: May 8, 2020

Section 2-Hazard Identification

GHS Classification:

Flammable Aerosol- Category 1
Gases under pressure - compressed gas
Acute Toxicity (inhalation) - Category 4
Skin irritation - Category 2
Eye irritation- Category 2A
Respiratory sensitization - Category 1
Skin sensitization - Category 1
Specific target organ toxicity (single exposure) - Category 3
Specific target organ toxicity (repeated exposure) - Category 2

GHS Label Elements:

Signal word:
Danger
Hazard Statements:

H222 - Extremely flammable aerosol.
H280 - Contains gas under pressure; may explode if heated.
H315 - Causes skin irritation.
H317 - May cause an allergic skin reaction.
H319 - May cause serious eye irritation.
H322 - Harmful if inhaled
H334 - May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H355 - May cause respiratory irritation.
H373 - May cause damage to organs through prolonged or repeated exposure.

Precautionary Statements:

Prevention:

P102 - Keep out of reach of children.
P202 - Do not handle until all safety precautions have been read and understood.
P210 - Keep away from heat/sparks/open flames/ hot surface/ no smoking.
P211 - Do not spray on an open flame or other ignition source.
P251 - Pressurized container: Do not pierce or burn, even after use.
P261 - Avoid breathing vapors or fumes.
P262 - Do not get in eyes, on skin, or on clothing.
P264 - Wash hands and other skin areas exposed to material thoroughly after handling.
P271 - Use only outdoors or in a well-ventilated area.
P280 - Wear protective gloves, protective clothing and eye protection.
P285 - In case of inadequate ventilation, wear respiratory protection.

Response:

P302+P352+P333+P313 - If on skin: wash with plenty of soap and water. If skin irritation or rash occurs get medical attention.
P304+P341 - If inhaled: if breathing if difficult, remove victim to fresh air and keep at rest a position comfortable for breathing.
P305+P351+P338 - If in eyes: rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P314 - Get medical advice if you feel unwell.
P342+P311 - If experiencing respiratory symptoms: Call a POISON CENTER or doctor.
P381 - Eliminate all ignition sources if safe to do so.

Storage:

P403+P405 - Store in a well-ventilated place. Store locked up.
P410 - Protect from sunlight.
P412 - Do not expose to temperature exceeding 50°C (122°F)

Disposal:

P501 - Dispose of contents/container in accordance with applicable local, regional, national, and international regulations.

Other Hazards:

None
Section 3- Composition/ Information on Ingredients

Notes:
There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to the health and environment and hence require reporting in this section.

The specific identity and/or exact percentage of composition has been withheld as a trade secret.

Section 4 – First Aid Measures

Eye Contact:
Flush with copious quantities of lukewarm water for at least 15 minutes. Remove contact lenses, if present and easy to do so. If irritation persists, get medical attention immediately.

Skin Contact:
Use a rag to remove excess foam from skin and remove contaminated clothing. Use a mild solvent, such as acetone (nail polish remover) or mineral spirits, may help in removing uncured foam residue from clothing or other surfaces (avoid eye/skin contact). Cured foam may be physically removed by persistent washing with water and non-abrasive soap. If irritation develops use mild cream. If it persists, seek medical attention.

Inhalation:
Remove to fresh air if breathing difficulty is experienced. If necessary, provide oxygen or artificial respiration by trained personnel and obtain medical attention.

Ingestion:
Do not induce vomiting. Consult physician. Do not give anything orally to an unconscious person. Get medical advice/attention.

Most Important Symptoms/Effects, Acute and Delayed:

Eye: May cause eye irritation.
Skin: May cause skin irritation. Symptoms may include redness, edema, drying, defatting and cracking of the skin. May cause allergic reaction.
Inhalation: May be harmful if inhaled. May cause respiratory irritation. May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Ingestion: May be harmful if swallowed. May cause gastrointestinal irritation: stomach distress, nausea, or vomiting.

Indication of immediate medical attention and special treatment needed:
Provide general supportive measures and treat symptomatically. Symptoms may not appear immediately. In case of an accident or if you fell unwell, seek medical advice immediately.
**Section 5 – Fire Fighting Measures**

**Suitable extinguishing media:**
Carbon dioxide, dry chemical, Halon 1211 or chemical foam. Water can be used to cool fire exposed containers to prevent pressure build-up and possible explosion.

**Unsuitable extinguishing media:**
Do not use water jets and high pressure water as these may spread the fire.

**Specific hazards arising from the chemical:**
Contain flammable propellant. Eliminate all ignition sources. Closed containers may explode due to build up of pressure when exposed to extreme heat. Cured foam will burn in the presence of heat. Exposure to combustion products may be hazard to health. Combustion products may include and are not limited to oxides of carbon, oxides of nitrogen, hydrogen fluoride and traces of hydrogen cyanide.

**Special protective equipment and precautions for fire fighters:**
Self-contained breathing apparatus and protective clothing should be worn in fighting large fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency plan.

**Section 6 – Accidental Release Measures**

**Personal precautions, protective equipment and emergency procedures:**
Use personal protective equipment recommended in section 8. Isolate the hazard area. Eliminate sources of ignition. Avoid breathing vapor.

**Environment precautions:**
Discharged into the environment must be avoided. Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillage cannot be contained.

**Methods and materials for containment and clean up:**
Restrict access to the area of the spill. Provide ventilation, NIOSH/MSHA approved respirator and protective clothing. Uncured foam is very sticky and the bulk of the spilled material should be scraped up and placed in container for disposal. Cleaning of the residual foam may require the use of rags and solvent such as acetone (nail polish remover), mineral spirits, or paint thinners. Dispose of saturated absorbent or cleaning materials appropriately, since spontaneous heating may occur. Once the foam has cured, it can only be removed physically by scraping, buffing, etc. Before disposing of containers, relieve the container of any remaining foam and pressure. Allow foam to fully cure before disposing (never discard in a liquid state). Local, state, provincial, federal laws and regulations may apply to release and disposal of this material, as well as those materials and items employed in the cleanup.

**Section 7 – Handling and Storage**

**Precautions for Safe Handling**
Keep away from sources of ignition- no smoking. Do no spray on an open flame or other ignition source. Pressurized container: do not pierce or burn. Container may explode if heated. Use only in a well-ventilated area or outdoors. When using, do not eat, drink or smoke.

**Conditions for Safe Storage, Including Any Incompatibilities**
Store under dry conditions, between 15.5°C (60°F) and 26.6°C (80°F). Keep away from sources of ignition. Do not expose to open flame or temperatures above 50°C (122°F). Storage above 32.2°C (90°F) will shorten the shelf life. Storage below 12.7°C (55°F) may affect foam quality if the chemicals are not warmed prior to use. Protect unused product from FREEZING. Keep containers upright. Keep away from children.

Engineering controls:
If vapor levels are expected to exceed exposure guidelines, wear a NIOSH/MSHA approved, positive pressure, supplied air respirator. In indoor applications, passive ventilation (opening of doors and windows) is recommended. Local exhaust as necessary to keep exposure levels within guidelines.

Personal protective equipment:
Safety glasses with side-protection, impermeable gloves (e.g., neoprene, nitrile, silver shield (R), coveralls or apron are important in preventing contamination of eyes, skin, or clothing. Wash thoroughly after handling. Facilities storing or utilizing this product should be equipped with an eyewash facility and safety shower.

compounds and water)

Section 10 – Stability and Reactivity

Reactivity:
No dangerous reaction known under conditions of normal use.

Chemical stability:
Stable under normal storage conditions. Avoid temperatures below 4°C (40°F). For longest shelf life, avoid storage above 38°C (100°F).

Possibility of hazardous reactions:
Elevated temperatures can cause product to decompose, releasing carbon dioxide. Contents are under pressure and expose to high temperature can cause containers to rupture or explode.

Conditions to avoid:
Heat, incompatible materials and sources of ignition. Avoid temperatures below 4°C (100°F) or temperatures above 38°C (100°F).

Incompatible materials:
Alcohols, strong bases, amines, metal compounds, ammonia and strong oxidizing agents.

Hazardous decomposition:
Carbon dioxides, nitrogen oxides, traces of incompletely burned carbon products, hydrogen cyanide, hydrogen fluoride and hydrochloric acid.

Section 11 – Toxicological Information

Information on the likely routes of exposure
- Inhalation: May cause allergy or asthma symptoms or breathing difficulties if inhaled.
- Ingestion: May be harmful if swallowed.
- Skin contact: May cause an allergic skin reaction.
- Eye contact: May cause serious eye irritation

Symptoms related to the physical chemical and toxicological characteristics: No information available.

Acute toxicity: Expected to have low acute oral toxicity; expected to have low inhalation toxicity.

Skin corrosion/irritation: May cause skin irritation.

Serious eye damage/irritation: May cause serious eye irritation.

Aspiration hazard: No data available.

Specific target organ toxicity - single exposure: May cause respiratory irritation.

Specific target organ toxicity - repeated exposure: May cause damage to the lungs, central nervous system and skin.

Carcinogenicity: 4,4'-Diphenyl Diisocyanate (MDI) (CAS# 101-68-8) and Polymethylene Polyphenyl Isocyanate (PMDI) (CAS# 9016-87-9): IARC group 3 carcinogen- not classified as to its carcinogenicity to humans. Not listed as a carcinogen by ACGIH, OSHA, or NTP.

MDI/PMDI did not cause birth defects in laboratory animals exposed to respirable aerosol droplets of MDI/PMDI (6mg/m³) for their lifetime.

Reproductive toxicity: 4,4'-Diphenyl Diisocyanate (MDI) (CAS# 101-68-8): rat,female, 6hr/day, 12mg/m³, days 6-15 (gestation period); 4mg/m³ (maternal/fetotoxicity).

Teratogenicity: No data available.

Germ-cell mutagenicity: Test data using laboratory animals was predominately negative.

Section 12 – Ecological Information

Ecotoxicity: Not experimentally determined. However, it is expected to have low acute aquatic toxicity based on the acute aquatic toxicity of individual components and their concentration in this mixture.
Persistence and degradability: Not readily biodegradable. In aquatic and terrestrial environments, this material reacts with water.

Bioaccumulative potential: Bioaccumulation potential is low.
Mobility in soil: Expected to have mobility based on product’s reactivity with water.

Other adverse effects: No data available.

Section 13 – Disposal Consideration

Disposal instructions:
Before disposing of containers, relieve container of any remaining foam and pressure. Allow dispensed product to fully cure before disposing. Never discard in liquid state. Dispose of contents/container in accordance with local, regional, national, and international regulations.

Waste from residues:
Dispose of in accordance with local regulations.

Contaminated packaging:
Empty containers should be taken to an approved waste handling site for recycling or disposal.

Section 14 - Transport Information

Shipping information:

Section 15 – Regulatory Information

U.S. Federal Regulations:

OSHA Hazard Communications Standard:
This material is classified as hazardous in accordance with OSHA 29 CFR 1910-1200

SARA 302/304 Extremely Hazardous Substances:
No components of this product are subject to the reporting requirements of these sections of Title III of SARA.

SARA 302/304 Emergency Planning & Notification:
No components of this product are subject to the reporting requirements of these sections of Title III of SARA.

SARA 311/312 Hazards:
Acute health hazard, chronic health hazard, fire hazard, reactive hazard, sudden release of pressure hazard
SARA 313:
MDI and PMDI are subject to the reporting levels established by Section 313 of the Emergency Planning and Community Right-to-Know Act of 1986.

Comprehensive Response Compensation and Liability Act (CERCLA):
This product contains the following CERCLA reportable substance: 4,4'-Diphenylmethane diisocyanate (CAS# 101-68-8): RQ: 2,268kg (5,000lb).

Clean Air Act (CAA):
4,4’-Diphenylmethane diisocyanate (CAS# 101-68-8) is listed as Hazardous Air Pollutants (HAPs) designated in CAA Section 112(b). This product does not contain any Class 1 or Class 2 Ozone depletors.

Clean Water Act (CWA):
4,4’-Diphenylmethane diisocyanate (CAS# 101-68-8) is listed as Hazardous Air Pollutants (HAPs) under the CWA.
None of the chemicals in this product are listed as Priority Pollutants under CWA.
None of the chemicals in this product are listed as Toxic Pollutants under the CWA.

U.S. State Regulations:

California Proposition 65:
⚠️ This product contains trace amount of substances known to the state of California to cause cancer or other reproductive harm.

Other U.S. State Inventories:
4,4’-Diphenylmethane diisocyanate (CAS# 101-86-8) is listed on the following State Hazardous Substance Inventories, Right-to-Know lists and/or Air Quality/ Air Pollutants lists: CA, DE, ID, IL, ME, MA, MN, NJ, PA, WA, WI.

Polymeric MDI (CAS# 9016-87-9) is listed on the following State Hazardous Substance Inventories, Right-to-Know lists and/or Air Quality/ Air Pollutants lists: DE, NJ, MN.

Isobutane (CAS# 75-28-5) is listed on the following State Hazardous Substance Inventories, Right-to-know lists and/or Air Quality/ Air Pollutants lists: DE, ME, MA, NJ, PA.

Dimethyl ether (CAS# 115-10-6) is listed on the following State Hazardous Substance Inventories, Right-to-Know lists and/or Air quality/ Air Pollutants lists: DE, ME, MA, MN, NJ, PA.

Propane (CAS# 74-98-6) is listed on the following State Hazardous Substance Inventories, Right-to-Know lists and/or Air Quality/ Air Pollutants lists: DE, MA, MN, NJ, PA, WA.

The ingredients of this product are reported in the following inventories:

TSCA:
All components of this product are listed or exempted from listing on the TSCA inventory of Chemical Substances.

DSL:
All Chemical substances in this product comply with CEPA 1999 NSNR and are on or exempted from listing on the Canadian Domestic Substances List (DSL).

Canadian National Pollutant Release Inventory (NPRI):
4,4’-Diphenylmethane diisocyanate (CAS# 101-68-8) and Polymeric MDI (CAS# 9016-87-9) are listed on the NPRI.

NFPA Profile: Health 2, Flammability 3, Reactivity 1

Section 16 – Other Information:
The information herein is given in good faith, but no warranty, express or implied, is made. Product users should make independents judgments of the suitability of this information to ensure proper use and to protect the health and safety of employees.
