## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

| Chemical Name | Exposure Limits |
|---|---|
| PTFE | 10mg/m3 ACGIH TWA (respirable particles)<br><br>5mg/m3 OSHA TWA ( respirable particles)<br><br>This is not a likely route of exposure as this product cannot become airborne under normal conditions of use. |

**PTFE is a relatively inert product as long as it is used at temperatures not exceeding 550°F. Do not exceed these temperature limits.**

**Appropriate Engineering Controls:** Use with adequate general or local exhaust ventilation to maintain exposure levels below the exposure limits. If the product is used at high temperatures, local exhaust ventilation may be required.

**Individual Protection Measures**:

**Respiratory Protection:** In operations where the occupational exposure limits are exceeded, a NIOSH approved respirator with organic vapor/particulate cartridges or supplied air respirator appropriate for the form and concentration of the contaminants should be used. Selection and use of respiratory equipment must be in accordance with OSHA 1910.134 and good industrial hygiene practice.

**Skin Protection:** Impervious gloves such as rubber or nitrile recommended where needed to avoid prolonged skin contact .

**Eye Protection:** Safety glasses or goggles recommended where needed to avoid eye contact.
