

POLY-TEMP®

PTFE Thread Seal Tape

5 – Pack Kit

WWW.ANTISEIZE.COM

Product Description

Our **POLY-TEMP® 5-PACK** is a kit comprised of our most popular grades of PTFE Thread Seal Tape. This Kit will ensure that the user has the correct Thread Seal Tape for the job.

The Kit consists of 2 rolls of our **POLY-TEMP® Medium Density** PTFE Thread Seal Tape, 1 roll of our **POLY-TEMP® Gas** Tape, 1 roll of our **POLY-TEMP® SSG** tape for Stainless Steel piping and 1 roll of our **POLY-TEMP® PNK** Pink Plumbers Tape.

Our **POLY-TEMP® Medium Density** tape is our most popular grade of Thread Seal Tape. It is a general purpose thread seal tape which can be used in many applications.

POLY-TEMP® Gas Tape is specially designed for use with many types of gasses including but not limited to Natural Gas, Propane, Butane, Oxygen, Welding Gasses and many more. Its Yellow color is an aid to signal an inspector that it is a Full Density Thread Seal Tape intended for gas service.

POLY-TEMP® SSG (XHD) is a Full Density, Extra Heavy Duty Thread Seal Tape infused with Pure Nickel Powders which has been designed to withstand the demanding requirements necessary to properly seal Stainless Steel Piping. It resists shredding and tearing which can occur if a lower quality tape is used.

POLY-TEMP® PNK (XHD) is a Full Density; Extra Heavy Duty Thread Seal Tape is designed especially for the Plumbing Industry and has a pink color to signify to an inspector that it is a Full Density Tape which is designed for use in Industrial and Commercial Plumbing applications.

To obtain more specific information and a listing of the various specification which each tape possesses we recommend that you review the Technical Data Sheet for each grade of **POLY-TEMP®** Thread Seal Tape contained in the 5 Pack Kit.

Cautions

Read all information on labels and Material Safety Data Sheets for each grade of **POLY-TEMP®** Thread Seal Tape contained in the kit prior to use. All products should be tested and evaluated for a particular purpose prior to use.
